

BICO

INTELLIGENT MONITORING SYSTEMS

WHO WE ARE

BICO Ltd. was founded in 2015 by extraordinary experienced specialists with enormous technical and business experience.

The main shareholder of BICO Ltd is a qualified electronics engineer with many years of business experience - for nearly 20 years he has been the President & CEO of the Japanese giant **SANYO** in Poland - without doubt one of the strongest world class players in the development of electronic technology. The company group invented in Poland launched hundreds of thousands of devices to the market, some of them, such as digital cameras or gas-powered air conditioning systems, were novelties worldwide technology novelties. He has also launched his own brand **APER** onto the Polish market, which was very successful at the time.

The other shareholder, though relatively young, can draw on a great deal of professional experience, paired with exceptional technical intuition. He started his career by building security systems for Carrefour shops, shopping malls, museums, airports and sports stadiums. He has done a special job in the video verification field of Volleyball Games Challenge.

Now, like no one else, he can perfectly lead any investment, including the advisory phase, design, cost estimation and control, executive supervision and final acceptance, service and maintenance inspections as well as alarm system service.

TO READY TOOL”***

WHO ARE WE?

COMPANY'S ACTIVITY

The core business of BICO Ltd. is the planning and implementation of intelligent monitoring systems as part of integrated system installations:

- **GMA** - alarm system,
- **CCTV** - video surveillance,
- **ACCESS CONTROL**,
- **ACCESS SYSTEM**,
- Mobile phone amplifiers in shopping malls, concert halls, etc.

We use only the latest generation technologies.

Selection of our projects:

- The airport in Lodz - video surveillance
- XPO Logistics - warehouses - access control, video surveillance, AP
- Wola Park shopping center in Warsaw - video surveillance
- Parking garage P + R in Warsaw - video surveillance
- International Convention Center in Katowice - Mobile Repeater
- Branches and headquarters of the Agricultural Social Insurance Company in Warsaw - video surveillance
- Hotel Inter Continental Warszawa
- and any more.

Employees of BICO Ltd. have many years of experience in design, installation and technical maintenance of large surveillance systems in factories, large real estate, settlements, in transport, including in the railway sector and in the entire logistics.

OFFER

Security Systems Vendor BICO Ltd. is focused on a comprehensive approach to our clients.

Included in our services is protection of real estate starting with a concept brief, developing the project plan and in consequence implementing all required hardware, software and communication infrastructure. We lay cable infrastructure and provide wireless access points, execute construction plans regarding all necessary security requirements.

Our offer includes:

- Intrusion Detection Systems Grades 1 – 4
- IP video surveillance systems
- Acoustic systems
- Access control systems
- Mechanical security systems
- Gas detection systems
- Workforce systems
- Peripheral protection systems
- Cable infrastructure
- Telecom systems
- Uninterrupted Power Supply Systems

OFFER

The span of our work activities reaches:

- Evaluation on site
- Development of a protection concept for the real estate object
- Counselling regarding available means of protection
- Execution of a danger analysis regarding the preparations of the requirements of the project
- Preparation of the protection system project sorted by branch-specific producers
- Preparation of requirements and further of the project for adapted real estate regarding adjustments according to security standards
- Shipment of hardware systems and elements
- Organisation of technical trainings
- Assurance of correct functionality of the system through regular maintenance and elimination of faults

We cooperate with:

FINISHED PROJECT

Thanks to our qualified engineers and experienced employees, in contrast of a relatively short presence on the market and security systems vendor BICO Ltd. already finished a series of projects in big real estate objects, which are spread across the country and electronically interconnected.

We achieved our success through our very good market expertise, which in turn allowed us to drop our prices under the average level of our competition. What makes it possible, is a network of construction companies, which under the direct control of our officers execute all time intense tasks.

The following list is an index of objects, which we maintain in **24/7/365** mode:

Bielany Wroclawskie - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Bydgoszcz - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Czeladz - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Duchnice - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Cosmetics lab „Joanna” Ltd.

E-65 Warsaw - Gdynia railway line

55 radio objects
CCTV, Intrusion Detection System, Access Control

Gdansk - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Isabellin - lab, factory

CCTV
Client: Cosmetics Lab „Joanna” Ltd.

Janki - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Koninko - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Ekol Logistics Ltd.

Koszalin - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Lublin - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Lodz - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Olsztyn - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Poznan - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Skawina - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Sosnowiec - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Ekol Logistics Ltd.

Tarnowo Podgorne - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

Tarnowo Podgorne - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Humite Ltd.

Tychy - storehouse

CCTV, Intrusion Detection System, Access Control
Client: Rohlig Suus Logistics Ltd.

FINISHED PROJECT

RAILWAY

Particular attention should be given to the intrusion and fault detection systems of mobile radio receivers designed, installed and maintained along the **E-65 Warsaw - Gdynia** railway line, which comprises a total of 55 radio objects.
